

BAROSSA BOWLAND AND MINI GOLF IMMERSIVE DINOSAUR AUDIO EXPERIENCE

EXECUTIVE SUMMARY

Barossa Bowland & Mini Golf is a standout family destination in Tanunda, South Australia, where guests can enjoy bowling and mini golf while surrounded by life-size, realistic dinosaur replicas. Seeking to elevate the prehistoric adventure, the venue aimed to create a fully immersive soundscape—bringing the Dinosaur Maze and Walk to life through subtle yet powerful environmental audio. To achieve this, the installation required a high-quality, discreet audio system capable of delivering 360 degree coverage across multiple outdoor zones, while maintaining the venue's visual aesthetics and thematic charm.

THE CHALLENGE

- Deliver realistic, immersive dinosaur audio throughout the outdoor attraction
- Maintain aesthetic integrity—sound to be felt, not seen
- Establish flexible zoning capabilities for different areas
- Provide scheduled and on-demand playback of sound effects and background ambience

THE SOLUTION

Barossa Valley Sound & Vision designed and deployed a premium audio system featuring:

Speaker System

Sonance Professional Series OMNI-6T in-ground loudspeakers

- Provides high-quality, 360-degree coverage
- Rugged construction for outdoor environments
- Subtle aesthetic integration within landscaping

THE SOLUTION (CONTINUED)

Australian Monitor ZONEMIX4

- o Software-driven zoning functionality
- o Scheduled playback from internal SD card
- o Additional media player integration for expanded MP3 playback options

Amplification

LEA CONNECT Series CS354

- o 4 x 350W channels
- o Reliable, high-performance power delivery across all audio zones

Strategically positioned throughout the dinosaur park, the Sonance OMNI-6T speakers ensure that dinosaur roars and ambient jungle sounds envelop guests, enhancing the sense of adventure without impacting the visual environment.

THE RESULT

Following installation, the venue reported an overwhelmingly positive response from guests especially young adventurers captivated by the lifelike soundscape.

"We couldn't be happier with the result that Sam & Amber Technology provided. Our beloved dinosaurs have now been given a voice through their new audio system, without interfering with the all-important aesthetics. The proof is in the delight on the faces of our many little adventurers." — Andrew, Proprietor, Barossa Bowland & Mini Golf

This upgrade has successfully transformed Barossa Bowland's Dinosaur Maze and Walk into a truly immersive prehistoric experience, reinforcing the venue's reputation as a must-visit family destination in South Australia.
