THE BERGS
MULTI-ZONE VIDEO DISTRIBUTION

PROJECT OVERVIEW

The Bondi Icebergs club and function spaces recently underwent a major refurbishment, rebranded as "The Bergs". Renovations included new bars, an expanded kitchen, larger dining areas, upgraded bathrooms, and dedicated function spaces. The venue is now highly flexible, capable of hosting multiple events simultaneously.

To support this flexibility, the venue implemented a WyreStorm Network HD Video-over-IP system, supplied by Amber Technology, for reliable multi-zone video distribution across LCD and LED displays.

PROJECT REQUIREMENTS

The venue needed a video solution that could:
· Deliver independent video content to multiple zones
· Allow staff to manage AV via tablets for simplicity
· Integrate multiple sources, including live events, sports, and pre-recorded media
· Quickly adapt to changing room layouts and event requirements

WYRESTORM SOLUTION

The video system used WyreStorm Network HD Video-over-IP, chosen for its flexibility, reliability, and intuitive app-based control, ideal for the fast-paced, multifunctional environment.

ambertech.com.au

Equipment Installed:
· 9 × 4K Encoders (6 × TV channel input and
 3 × HDMI input)
· 2 × 4K Receivers (for LED and LCD displays
throughout the venue)
· 2 × 4K Multiview Receivers (for large LED screens,
supporting multiple inputs simultaneously)

This setup consolidated multiple video sources, Foxtel,
Sky STBs, and HDMI wallplate inputs, and distributed
them efficiently across all zones. Staff can control the
system via tablet, switching content between zones
quickly and easily.

KEY HIGHLIGHTS
· Seamless multi-zone video distribution throughout the
venue
· Intuitive tablet control for easy operation and minimal
training
· Scalable, modular design allowing simultaneous events
and future upgrades
· Supports multiple simultaneous video inputs, including
live streams and HDMI sources

KEY HIGHLIGHTS
Scott Masters, who oversaw the AV deployment, said:
"I deployed the WyreStorm system because it's flexible,
powerful, easy to use, and has its own app control. I've had
experience with various IPTV systems over the years, but the
WyreStorm system is almost 'out-of-the-box', it's far
quicker to configure and deploy. Staff can now manage
video across all zones effortlessly, ensuring smooth
operation for back-to-back events and varied content."
